## CHASING DRAGONS

**THIS VIRTUAL PROGRAM WILL BE HELD ON  
FEBRUARY 7TH, 2023, 6:30 P.M.  
SIGN UP @ [TRLANDCONSERVANCY.ORG](https://trlandconservancy.org)**

Dragonflies are among the earliest of insects and have been on earth for an estimated 300 million years. The largest fossil dragonfly had a wingspan of over two feet! Although smaller today, dragonflies are the fastest flying insects and, along with their smaller relatives, the damselflies, remain important environmental indicators of the quality of our environment.

Presented by Jay Kaplan, Director, Roaring Brook Nature Center in Canton, CT
